### Directors' Report

The Directors of Ansvar Insurance Limited (Ansvar) (the Company) submit their report for the year ended 31 December

The names and details of Ansvar's Directors during the financial year and until the date of this report are as follows. Directors were in office for the entire period unless otherwise stated.

### Patricia Kelly

Chairperson and independent non-executive Director

Patricia joined the Board in May 2014 and was appointed Chairperson in June 2018. Patricia has held senior management roles in the financial services industry including as Executive General Manager Strategy and Business Development Personal Insurance at Suncorp/AAMI, General Manager AAMI New South Wales and Director and Executive General Manager Life and Superannuation at Norwich Union Life Australia. Patricia is a past President and Honorary Life Member of the Insurance Institute of Victoria and a former Director of the Australian and New Zealand Institute of Insurance and Finance (ANZIIF). Patricia is also a non-executive Director and Chairperson of RACT Insurance Pty Limited and a non-executive Director of the Royal Automobile Club of Victoria and Legal Practitioners Liability Committee. Patricia is the Chairperson of the Nominations and Remuneration Committee and a member of the Audit Committee, Risk and Compliance Committee and Technology Committee.

### Warren Hutcheon MBA, GAICD, Fellow ANZIIF (CIP)

**Executive Director** 

Warren was appointed Chief Executive Officer and Director of Ansvar in May 2014. Prior to joining Ansvar he was the Chief Executive Officer of the Victorian Managed Insurance Authority, the risk and insurance advisor to the Victorian Government, Warren has over 30 years' experience in risk and insurance. He has held senior management positions in underwriting, claims, operational management, strategy and organisational change. Warren is an active supporter of the Australian insurance industry and served as Chairperson of the ANZIIF General Insurance Faculty Advisory Board. Warren is also an active community member, holding the position of Board member of Bayside Church Incorporated, Bayside Community Care and associated entities. Warren is a Director of ACS (NZ) Limited and Ansvar Risk Management Services Pty Limited and a member of the Technology Committee.

### Michael Grantham MBA, FAICD Independent non-executive Director

Michael was appointed to the Board in March 2016. Michael has over 30 years' experience as an information and communications technology professional. He is currently the General Manager for Government Engagement at NBN Co Limited. Michael is a former Director of CGU Australia Limited, CGU Insurance Limited and Insurance Network Services. He has also held the position of Chief Information Officer at CGU Insurance Limited, Australian Customs and Border Protection and Tenix. Michael is the Chairperson of Ansvar Risk Management Services Pty Limited and the Technology Committee, and a member of the Audit Committee, Nominations and Remuneration Committee and Risk and Compliance Committee.

### **David Lambert** BA (Hons)/LLB Independent non-executive Director

David was appointed to the Board in July 2018. He is an experienced executive, Director and commercial lawyer with diverse international experience. David has held senior roles in risk, strategy and legal practice including Blackmagic Design, EnergyAustralia, National Foods, Clifford Chance, Ashton Mining and Bapcor Limited. He is currently the Corporate Counsel and Company Secretary of Total Tools. David is a member of the Audit Committee, Nominations and Remuneration Committee and Risk and Compliance Committee.

### Helen Thornton BEc. CA. GAICD Independent non-executive Director

Helen joined the Board in May 2018 and was appointed Chairperson of the Audit Committee and Risk and Compliance Committee in June 2018. A Chartered Accountant, Helen has extensive experience in finance, governance, audit and risk management. She has held senior management roles at Deloitte, KPMG, BHP Limited and BlueScope Steel Limited where she was responsible for the company's global risk management function. Helen is also an experienced non-executive Director. Her previous directorships include Big Sky Building Society, Rural Finance Corporation and Zoos Victoria. Her current directorships include Deputy Chairperson of the Treasury Corporation of Victoria and non-executive Director of Yarra Valley Water, Austin Health, Legal Practitioners Liability Committee and ISPT Pty Limited. Helen is a member of the Nominations and Remuneration Committee.

### Directors' Report

Jacinta Whyte

MC Inst. M, ACII, Chartered Insurer

Non-executive Director

Jacinta was appointed to the Board in August 2013. She is the Deputy Group Chief Executive of Ecclesiastical Insurance Office Plc. Jacinta joined the Ecclesiastical Group in 2003 as General Manager and Chief Agent of the Group's Canadian business. She was responsible for turning around the performance of the Canadian operation and building a high performing team and a successful specialist insurance business. Jacinta is responsible for the Group's general insurance operations worldwide, covering the United Kingdom, Ireland, Australia and Canada. Jacinta commenced her career as an underwriter in 1974 with Royal and Sun Alliance and held a number of senior executive positions in Ireland and Canada. Jacinta is a member of the Nominations and Remuneration Committee.

As at the date of this report, the Directors held no interests in the shares and options of Ansvar Insurance Limited.

### **Company Secretary**

Dana Argyropoulos BEc, FGIA Dana was appointed as Company Secretary on 12 November 2018. Dana is an experienced Company Secretary having held positions within the private and public sectors. Prior to joining Ansvar, Dana was the Corporate Secretary of the Victorian Managed Insurance Authority, a position she held for 12 years. Dana was also a Company Secretary at ANZ Bank.

#### **Principal activities**

Ansvar is a company limited by shares that is incorporated and domiciled in Australia. Ansvar Insurance Limited and its dormant subsidiary, Ansvar Insurance Services Pty Limited, form the consolidated Group (the Group). The Group's principal activities in the financial year consisted of the provision of general insurance products to its customers in its core segments of faith, care, property owners (including heritage), education and community. It also continued to provide claims run-off services to ACS (NZ) Limited (ACS), its former subsidiary domiciled in New Zealand, under a management services agreement. During 2019 Ansvar seconded staff and provided support services to Ansvar Risk Management Services Pty Limited (ARMS) which in turn delivered risk services to Ansvar's customers.

Ansvar continues to be ultimately owned by a charity and provided further grants of \$250K (2018: \$248K) during the financial year through its Community Education Programme.

#### Review of operations

In 2019 Ansvar generated a loss before income taxation of \$4,956K (2018: profit \$6,029K). The loss before income taxation was driven by a net underwriting loss of \$12,348K (2018: profit \$1,394K) due primarily to the strengthening of PSA net claims liabilities of \$7,118K following higher than expected claim numbers and an adverse impact of \$4,124K pertaining to the decrease in the weighted average discount rate to 1.24% (2018: 2.26%). The net underwriting loss was materially offset by a very strong investment performance with the Net Investment Income of \$7,460K significantly exceeding the prior year actual of \$4,772K with Ansvar's investment strategy set for the investment portfolio to act as a hedge against the impact of the movement in discount rates on net claims liabilities.

At 31 December 2019 Ansvar's Prescribed Capital Amount Coverage Ratio was 1.82 (2018: 2.73) which was within the target range of 1.75-2.00 approved by the Board. In May 2019 its financial strength rating from its rating agency, A.M. Best, was reaffirmed as Excellent/A- (2018: Excellent/A-).

Ansvar employed 97 full time equivalent staff at 31 December 2019 (2018: 96).

### Changes in state of affairs

During the financial year there were no significant changes in the state of affairs of the Group.

### Subsequent events

There has not been any matter or circumstance that has occurred between the balance sheet date and the date of this report that has significantly affected, or may significantly affect, the Group's and the Company's operations in future financial years, the results of those operations or the Group's and the Company's state of affairs in future financial years. Refer to Note 22 for the impact of the hail catastrophe event in January 2020 and the East Coast Low storms in February 2020 on the calculation of the liability adequacy test.

### **Future developments**

Disclosure of information with regard to likely developments in the operations of the Group in future financial years and the expected results of those operations is likely to result in unreasonable prejudice to the Group. Accordingly, this information has not been disclosed in this report.

### Directors' Report

### Directors' meetings

The following table sets out the number of Board and Board Committee meetings during the financial year the Director was eligible to attend and the number of meetings attended by each Director.

Directors	В	oard		udit imittee	Remu	tions and neration mittee	Comp	k and oliance mittee		nology mittee

Jacinta Whyte	5	5		-	4	4	1		-	

Section 11 of the Company's Constitution provides an indemnity to every person that is or has been a Director, alternate Director, executive officer or officer of the Company or related corporate bodies. During the financial year the Company paid a premium in respect of a contract insuring the abovementioned Directors of the Company, the Company Secretary and all executive officers of the Company and any related corporate body against a liability incurred as such a Director, Company Secretary, executive officer or corporate body to the extent permitted by the *Corporations Act 2001*. The contract of insurance prohibits the disclosure of the nature of the liability and the amount of the premium.

The Company has not otherwise, during the financial year and until the date of this report, indemnified or agreed to indemnify an officer or auditor of the Company or any related corporate body against a liability incurred as such officer or auditor.

### **Environmental regulations**

The operations of the Company are not subject to any particular or significant environmental regulation under a law of the Commonwealth or of a State or Territory. There have been no known breaches of any environmental requirements applicable to the Company.

### Auditor's Independence Declaration

The Auditor's Independence Declaration is included on page 5 of the Annual Financial Report.

#### Rounding

The Company is a company of the kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* dated 24 March 2016 and accordingly all amounts in the Directors' Report and the annual financial statements are rounded to the nearest thousand Dollars unless otherwise indicated.

The Directors' Report is signed in accordance with a resolution of the Directors made pursuant to section 298(2) of the *Corporations Act 2001*.

On behalf of the Directors:

P M Kelly Chairperson

Melbourne 25 February 2020 H Thornton Director

The Board of Directors Ansvar Insurance Limited Level 5, 1 Southbank Boulevard Southbank VIC 3006

Dear Directors,

### **Independence Declaration – Ansvar Insurance Limited**

In accordance with section 307C of the *Corporations Act 2001*, I am pleased to provide the following declaration of independence to the directors of Ansvar Insurance Limited.

As lead audit partner for the audit of the consolidated financial statements of Ansvar Insurance Limited for the financial year ended 31 December 2019, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

Yours sincerely

**DELOITTE TOUCHE TOHMATSU**

## Independent Auditor's Report to the Members of Ansvar Insurance Limited

#### Opinion

We have audited the consolidated financial report of Ansvar Insurance Limited ("the Company") and its subsidiary ("the Group"), which comprises the balance sheet as at 31 December 2019, the comprehensive operating statement, statement of changes in equity and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- (i) giving a true and fair view of the Group's financial position as at 31 December 2019 and of its financial performance for the year then ended; and
- (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.

### Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the consolidated financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Group, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other Information

The Directors are responsible for the other information. The other information comprises the information included in the Group's Directors' Report, but does not include the consolidated financial report and our auditor's report thereon.

Our opinion on the consolidated financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Liability limited by a scheme approved under Professional Standards Legislation.

Member of Deloitte Asia Pacific Limited and the Deloitte Network.

### **Deloitte**

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors' for the Financial Report

The Directors are responsible for the preparation of the consolidated financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the consolidated financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial report, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the consolidated financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this consolidated financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial report, including the disclosures, and whether the consolidated financial report represents the underlying transactions and events in a manner that achieves fair presentation.

### **Deloitte**

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### Directors' Declaration

In the opinion of the Directors of Ansvar Insurance Limited:

- The consolidated financial statements and notes of Ansvar Insurance Limited for the financial year ended 31 December 2019 are in accordance with the Corporations Act 2001 including:
  - Giving a true and fair view of the consolidated Group's financial position as at 31 December 2019 and of its performance for the year ended on that date; and
  - Complying with Australian Accounting Standards including Interpretations and the Corporations Regulations 2001.
- The consolidated financial statements and notes also comply with International Financial Reporting Standards as disclosed in Note 2; and
- There are reasonable grounds to believe that the Group will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Directors made pursuant to section 295(5) of the Corporations Act 2001:

P M Kelly Chairperson

H Thornton Director

Melbourne 25 February 2020

## Notes to the Financial Statements For the financial year ended 31 December 2019

#### 1. Corporate information

The consolidated financial statements of Ansvar for the year ended 31 December 2019 were authorised for issue in accordance with a resolution of the Directors on 25 February 2020.

Ansvar is a company limited by shares that is incorporated and domiciled in Australia. Ansvar's immediate parent is Ecclesiastical Insurance Office Plc which owns 100% of the ordinary shares. Ecclesiastical Insurance Office Plc is a wholly-owned subsidiary of AllChurches Trust Limited, which is the ultimate parent. The nature of the operations and principal activities of the Group are outlined in the Directors' Report.

### 2. Significant accounting policies

#### Basis of preparation

The consolidated financial report is a general purpose financial report which has been prepared in accordance with the *Corporations Act 2001*, Australian Accounting Standards and other authoritative pronouncements of the Australian Accounting Standards Board. The consolidated financial report also complies with Australian equivalents to International Financial Reporting Standards as issued by the International Accounting Standards Board. Compliance with Australian Accounting Standards ensures that the financial statements and notes of the Group and the Company comply with International Financial Reporting Standards.

The financial statements comprise the consolidated financial statements of the Group and the Company. For the purposes of preparing the consolidated financial statements, the Group and Company are for-profit entities.

The consolidated financial report has been prepared on a historical cost basis, except for investments which have been measured at fair value and net claims liabilities which have been measured as outlined in Notes 2(e), 2(f) and 3.

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported. Assets and liabilities are presented in a decreasing order of liquidity on the face of the Balance Sheet. Information with regard to the current and non-current amounts of assets and liabilities is included in the relevant note to the financial statements.

All amounts are presented in Australian Dollars. The Company is a company of the kind referred to in *ASIC Corporations* (Rounding in Financial/Directors' Reports) Instrument 2016/191 dated 24 March 2016 and accordingly all amounts in the Directors' Report and the annual financial statements are rounded to the nearest thousand Dollars unless otherwise indicated.

The following significant accounting policies have been adopted in the preparation and presentation of the financial report:

### (a) Principles of general insurance business

An insurance contract is defined as a contract under which one party (the insurer) accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder.

### (b) Gross premium earned and gross unearned premium liability

Premium comprises amounts charged to policyholders including the Emergency Services Levy, but excluding Stamp Duty and Goods and Services Taxation (GST). The earned portion of premium received and receivable, including unclosed business, is recognised as revenue. Premium is earned from the date of attachment of risk. Premium pertaining to unclosed business is brought to account with reference to the previous year's premium processing delays with due allowance for any changes in the pattern of new business and renewals.

The pattern of recognition of income over the policy period is based on time, which closely approximates the pattern of risks underwritten. The gross unearned premium liability is determined by apportioning the premium written over the period from date of attachment of risk to the expiry of the policy term. Gross premium written which has not been earned at the balance sheet date is included in the gross unearned premium liability in the Balance Sheet.

### (c) Reinsurance premium incurred and ceded unearned premium asset

Premium ceded to reinsurers is recognised as an expense in accordance with the indemnity period of the corresponding reinsurance contract. Accordingly, a portion of outward reinsurance premium is treated as a ceded unearned premium asset at the balance sheet date.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

#### (d) Unexpired risks liability

Liability adequacy testing is performed at each balance sheet date in order to recognise any deficiencies in the adequacy of the unearned premium liability arising from the carrying amount of the net unearned premium liability less any related deferred acquisition costs not meeting the estimated future net claims incurred under current insurance contracts.

The estimated future net claims incurred under current insurance contracts is measured using the present value of the expected cash flows relating to future claims and associated expenses, discounted using a risk free discount rate, plus an additional fair value risk margin to reflect the inherent uncertainty of those estimated cash flows.

Liability adequacy testing is performed at the level of a portfolio of contracts that are subject to broadly similar risks and are managed together as a single portfolio. Any deficiency arising from the test is recognised in the Comprehensive Operating Statement through the write down of any related deferred acquisition costs. If an additional liability is required, it is recognised as an unexpired risks liability in the Balance Sheet.

### (e) Gross claims incurred and gross claims liabilities

Gross claims incurred and gross claims liabilities are recognised in respect of all business written. Gross claims liabilities comprise claims reported but not yet paid, claims incurred but not reported (IBNR), claims incurred but not enough reported, the anticipated direct and indirect claims handling expenses of settling those claims and a risk margin. Gross claims liabilities are assessed by reviewing individual claim files and estimating changes in the ultimate cost of settling claims using statistical methods based on past experience and trends.

No discounting has been applied to gross claims liabilities for short tail classes as the impact is not material. The gross claims liabilities for long tail classes are measured as the present value of the expected future claim payments. These payments are estimated on the basis of the ultimate cost of settling claims, which is affected by factors arising during the period to settlement such as normal and superimposed inflation. The expected future payments are discounted to present value at the balance sheet date using risk free discount rates.

### (f) Reinsurance and other recoveries

Reinsurance and other recoveries received or receivable in respect of gross claims paid and movements in reinsurance and other recovery assets in respect of claims reported but not yet paid, claims incurred but not reported and claims incurred but not enough reported are recognised in the Comprehensive Operating Statement in the year they occur.

Reinsurance and other recovery assets are actuarially assessed in a manner similar to the assessment of gross claims liabilities and are measured as the present value of the expected future receipts, calculated on the same basis as the gross claims liabilities [refer to Note 2(e)].

### (g) Deferred Emergency Services Levy

A liability for Emergency Services Levy is recognised on premium written to the balance sheet date. The Emergency Services Levy is expensed on the same basis as the recognition of premium written, with the portion relating to unearned premium being recorded as deferred Emergency Services Levy.

#### (h) Gross deferred acquisition costs

Acquisition costs, which represent gross commission paid in respect of general insurance contracts, are deferred and recognised as assets where they can be reliably measured and where it is probable that they will give rise to premium earned that will be recognised in the Comprehensive Operating Statement in subsequent reporting periods.

Deferred acquisition costs are amortised systematically in accordance with the expected pattern of the incidence of risk under the general insurance contracts to which they relate. This pattern of amortisation corresponds to the earning pattern of the corresponding premium written. Deferred acquisition costs are measured at the lower of cost and recoverable amount.

### (i) Fee income

Fee income is recognised when it is probable that the economic benefits will flow to the Group and the income can be reliably measured, regardless of when the payment is being made.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

### (i) Investment income

Interest income is recognised when it is probable that the economic benefits will flow to the Group and the income can be reliably measured. Interest income is accrued on a time proportionate basis with reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

### (k) Foreign currency translation

All foreign currency transactions are brought to account using the exchange rate in effect at the date of the transaction. Foreign currency monetary items at the balance sheet date are translated at the exchange rate existing at the balance sheet date. Non-monetary assets and liabilities carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined.

### (I) Leases

The Group assesses at contract inception whether a contract is or contains a lease, i.e. if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group applies a single recognition and measurement approach for all leases, except for short term leases and leases of low value assets. The Group recognises lease liabilities to make lease payments and right of use assets representing the right to use the underlying assets.

### Right of use assets

The Group recognises right of use assets at the commencement date of the lease, i.e., the date the underlying asset is available for use. Right of use assets are measured at cost less any accumulated depreciation and impairment and adjusted for any remeasurement of lease liabilities. The cost of right of use assets includes the amount of lease liabilities recognised, initial direct costs incurred and lease payments made at or before the commencement date less any lease incentives received. Right of use assets are depreciated on a straight line basis over the term of the lease.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

### Lease liabilities

At the commencement date of the lease the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments including in-substance fixed payments, less any lease incentives receivable, variable lease payments that depend on an index or a rate and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments, for example, changes to future payments resulting from a change in an index or rate used to determine such lease payments, or a change in the assessment of an option to purchase the underlying asset.

### Short term leases and leases of low value assets

The Group applies the short term lease recognition exemption to its short term leases of equipment, i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the lease of low value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short term leases and leases of low value assets are recognised as an expense on a straight line basis over the lease term.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

#### (m) Income taxation

#### Current taxation

Current taxation is calculated with reference to the amount of income taxation payable or recoverable in respect of the taxable income or loss for the period. It is calculated using taxation rates and laws that have been enacted or substantively enacted by the balance sheet date. Current taxation for current and prior periods is recognised as a liability or asset to the extent that it is unpaid or refundable.

### Deferred taxation

Deferred taxation is accounted for using the comprehensive balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding taxation base of those items.

In principle deferred taxation liabilities are recognised for all taxable temporary differences. Deferred taxation assets are recognised to the extent that it is probable that sufficient taxable amounts will be available against which deductible temporary differences or unused taxation losses and taxation offsets can be utilised. However, deferred taxation assets and liabilities are not recognised if the temporary differences giving rise to them arise from the initial recognition of assets and liabilities, other than as a result of a business combination, which does not affect either taxable income or accounting profit before income taxation.

Deferred taxation assets and liabilities are recognised for taxable temporary differences arising on investments in subsidiaries, branches, associates and joint ventures except where the Group is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred taxation assets arising from deductible temporary differences associated with these investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable income against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Deferred taxation assets and liabilities are measured at the taxation rates that are expected to apply to the periods when the asset and liability giving rise to them are realised or settled, based on taxation rates and laws that have been enacted or substantively enacted by the balance sheet date. The measurement of deferred taxation assets and liabilities reflects the taxation consequences that would follow from the manner in which the Group expects, at the balance sheet date, to recover or settle the carrying amount of its assets and liabilities.

### Current and deferred taxation for the period

Current and deferred taxation is recognised as an expense or benefit in the Comprehensive Operating Statement, except when it relates to items credited or debited directly to equity, in which case the deferred taxation is also recognised directly in equity, or where it arises from the initial accounting for a business combination, in which case it is taken into account in the determination of goodwill or excess.

### Australian Multiple Entry Consolidated Group

Ansvar Insurance Limited, Ansvar Risk Management Services Pty Limited and Ansvar Insurance Services Pty Limited formed an Australian Multiple Entry Consolidated Group (MEC Group) for income taxation purposes with effect from 8 January 2018 of which Ansvar Insurance Limited is the head company.

Ansvar Insurance Limited, as the head company, assumes the following balances from companies within the MEC Group:

- Current income taxation balances arising from external transactions recognised by companies in the MEC Group occurring on or after the implementation date.
- Deferred income taxation assets arising from unused income taxation losses and unused income taxation credits recognised by companies in the MEC Group.

A Tax Funding Agreement has been entered into by the head company and the other companies in the MEC Group. Companies in the MEC Group continue to be responsible, by the operation of the Tax Funding Agreement, for funding income taxation payments required to be made by the head company arising from underlying transactions of the companies in the MEC Group. Companies in the MEC Group make/receive contributions to/from the head company for the balances assumed by the head company. The contributions are calculated in accordance with the Tax Funding Agreement. The contributions are payable as set out in the Tax Funding Agreement and reflect the timing of Ansvar Insurance Limited's obligations to make payments to the Australian Taxation Office.

Assets and liabilities which arise as a result of balances transferred from companies within the MEC Group to the head company are recognised as a related party receivable or payable in the Balance Sheet.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

### (n) Goods and Services Taxation

Income, expenses, assets and liabilities are recognised net of GST except:

- Where the amount of GST incurred is not recoverable from the Australian Taxation Office.
- For receivables and payables which are recognised inclusive of GST.

The net amount of GST recoverable from or payable to the Australian Taxation Office is included as part of receivables or payables.

Cash flows are included in the Cash Flow Statement on a gross basis. The GST component of cash flows arising from investing and financing activities which is recoverable from or payable to the Australian Taxation Office is classified as cash flows from operating activities.

#### (o) Financial assets

In accordance with AASB 1023 General Insurance Contracts the Group is required to measure financial assets held to back the insurance liabilities at fair value through profit or loss.

AASB 139 Financial Instruments: Recognition and Measurement has an option to measure all financial assets at fair value through profit or loss. Investments constitute a group of financial assets which are managed, and their performance evaluated, on a fair value basis in accordance with the Group's Investment Policy. The Group has elected to measure all financial assets that are not held to back the insurance liabilities at fair value through profit or loss upon initial recognition.

Fair value is determined with reference to the closing bid price of the instrument at the balance sheet date.

#### Loans

Loans are measured at amortised cost using the effective interest method less impairment.

#### (p) Financial instruments issued by the Group

### Debt and equity instruments

Debt and equity instruments are classified as either liabilities or as equity in accordance with the substance of the contractual arrangement.

### Transaction costs on the issue of equity instruments

Transaction costs arising on the issue of equity instruments are recognised directly in equity as a reduction of the proceeds of the equity instruments to which the costs relate. Transaction costs are the costs that are incurred directly in connection with the issue of those equity instruments and which would not have been incurred had those instruments not been issued.

#### Interest and dividends

Interest and dividends are classified as expenses or as distributions of profit consistent with the Balance Sheet classification of the related debt or equity instruments.

### (q) Impairment of assets

At each balance sheet date the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually and whenever there is an indication that the asset may be impaired.

The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre taxation discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or cash generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash generating unit is reduced to its recoverable amount. An impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the impairment loss reduces the revaluation amount.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

#### (q) Impairment of assets (continued)

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash generating unit is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset or cash generating unit in prior years. A reversal of an impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the reversal of the impairment loss increases the revaluation amount.

### (r) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash in banks and investments in money market instruments, net of outstanding bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the Balance Sheet.

Cash equivalents are held for the purpose of meeting short term cash commitments rather than for investment purposes and include money market instruments with short maturities (three months or less from the date of acquisition) which are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

#### (s) Receivables

Trade receivables represent receivables associated with the premium, reinsurance and other recoveries, claims and commission. All other receivables are classified as non-trade receivables.

Receivables are stated at the amounts to be received in the future, less any impairment losses. The amounts are discounted where the effect of the time value of money is material. The recoverability of receivables is assessed on an ongoing basis and provision for impairment is made based on objective evidence and with regard to past default experience. The impairment charge is recognised in the Comprehensive Operating Statement. Receivables which are known to be uncollectible are written off.

Receivables are non-interest bearing and are normally settled between 30 days and 12 months. The net carrying amount of receivables is a reasonable approximation of the fair value of the assets due to the short term nature of the assets.

#### (t) Furniture, fittings and equipment

Furniture, fittings and equipment are recognised at cost less accumulated depreciation and impairment. Cost includes expenditure that is directly attributable to the acquisition of the item. In the event that settlement of all or part of the purchase consideration is deferred, cost is determined by discounting the amounts payable in the future to their present value as at the date of acquisition.

Depreciation is charged on furniture, fittings and equipment. Depreciation is calculated on a straight line basis so as to write off the net cost or other revalued amount of each asset over its expected useful life to its estimated residual value. Leasehold improvements are depreciated over the period of the lease or estimated useful life, whichever is the shorter, using the straight line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each financial year.

The following estimated useful lives are used in the calculation of depreciation:

Computer hardware

3-9 years

· Leasehold improvements

Term of lease

Office furniture and equipment

3 years

#### (u) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition intangible assets are carried at cost less any accumulated amortisation and impairment. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

#### (u) Intangible assets (continued)

considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Comprehensive Operating Statement in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis

An intangible asset is derecognised upon disposal, i.e., at the date the recipient obtains control, or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset, calculated as the difference between the net disposal proceeds and the carrying amount of the asset, is included in the Comprehensive Operating Statement.

### (v) Trade and other payables

Trade payables represent payables associated with the premium, reinsurance and other recoveries, claims and commission. All other payables are classified as non-trade payables.

Trade and other payables are stated at cost, which is the fair value of future payments for the purchase of goods and services. Payables are recognised when the Group becomes obliged to make these payments. The amounts are discounted where the effect of the time value of money is material.

Trade and other payables are non-interest bearing and normally settled within 12 months. The non-current portion has not been discounted as the effect of the time value of money is not material.

#### (w) Employee benefits

Provision is made for benefits accruing to employees in respect of wages and salaries, annual leave and long service leave for services rendered to the balance sheet date when it is probable that settlement will be required and the amounts can be reliably measured.

Provisions made in respect of employee benefits expected to be settled within 12 months are measured as the amount unpaid at the balance sheet date at current pay rates in respect of employees' services up to that date.

Provisions made in respect of employee benefits that are not expected to be settled within 12 months are measured at the present value of the expected future cash outflows to be made by the Group in respect of services provided by employees up to the balance sheet date. Consideration is given to the expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using interest rates on high quality corporate bonds with terms to maturity that match, as closely as possible, the estimated future cash outflows.

### Defined contribution funds

Contributions to defined contribution superannuation funds are expensed when incurred.

### (x) Principles of consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entity controlled by the Company (its subsidiary) referred to as 'the Group' in these financial statements. Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The consolidated financial statements include the information and results of the controlled entity from the date on which the Company obtains control and until such time as the Company ceases to control the entity.

Consistent accounting policies are employed in the preparation and presentation of the consolidated financial statements.

In preparing the consolidated financial statements all intercompany balances and transactions and unrealised profits arising within the economic entity are eliminated in full.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

### (y) New Accounting Standards and Interpretations

The accounting policies adopted are consistent with those of the previous financial year except for the following Australian Accounting Standards adopted with effect from 1 January 2019:

Standard	Summary	Application date of standard	Note	Application date for Group
AASB 16	Leases  AASB 16 requires lessees to account for all leases under a single on balance sheet model in a similar way to finance leases under AASB 117 Leases. The Standard includes two recognition exemptions for lessees – leases of low value assets, for example, personal computers, and short term leases, i.e., leases with a lease term of 12 months or less. At the commencement date of a lease a lessee will recognise a liability to make lease payments, i.e., the lease liability, and an asset representing the right to use the underlying asset during the lease term, i.e., the right of use asset.  Lessees must separately recognise the interest expense on the lease liability and the depreciation expense on the right of use asset.	1 January 2019	В	1 January 2019
Lessees must remeasure the lease liability upon the occurrence of certain events, for example, a change in the lease term or a change in future lease payments resulting from a change in an index or rate used to determine the payments. The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right of use asset.				
AASB Interpretation 23	Uncertainty over Income Tax Treatments and AASB 2017-4 Amendments to Australian Accounting Standards – Uncertainty over Income Tax Treatments  This Interpretation clarifies application of the recognition and measurement requirements in AASB 112 Income Taxes when there is uncertainty over income taxation treatments.  The Interpretation specifically addresses the following:  Whether an entity considers uncertain taxation treatments separately.  The assumptions an entity makes about the examination of taxation treatments by taxation authorities.  How an entity determines taxable income/assessable loss, taxation bases, unused taxation losses, unused taxation credits and taxation rates.  How an entity considers changes in facts and circumstances.  An entity has to determine whether to consider each uncertain taxation treatment separately or together with one or more other uncertain taxation treatments. The approach that better predicts the resolution of the uncertainty should be followed.	1 January 2019	В	1 January 2019

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 2. Significant accounting policies (continued)

### (y) New Accounting Standards and Interpretations (continued)

### Accounting Standards not yet effective

There are a number of new and revised Australian Accounting Standards which have been issued by the Australian Accounting Standards Board (AASB) for which the mandatory application dates fall after the end of this financial year. None of these Standards have been adopted early and applied in the current financial year.

Standard	Summary	Application date of standard	Note	Application date for Group
Conceptual Framework AASB 2019-1	Conceptual Framework for Financial Reporting Amendments to Australian Accounting Standards – References to the Conceptual Framework	1 January 2020	В	1 January 2020
	The revised Conceptual Framework is not a Standard and none of the concepts override those in any Standard or any requirements in a Standard. The purpose of the Conceptual Framework is to assist the AASB in developing Standards, to help preparers develop consistent accounting policies if there is no applicable Standard in place and to assist all parties to understand and interpret the Standards.			
	The revised Conceptual Framework includes some new concepts, provides updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts. It is arranged in eight chapters as follows:			
	Chapter 1 – The objective of financial reporting.			
	Chapter 2 – Qualitative characteristics of useful financial information.			
	Chapter 3 – Financial statements and the reporting entity.			
	Chapter 4 – The elements of financial statements.			
	Chapter 5 – Recognition and derecognition.			
	Chapter 6 – Measurement.			
	Chapter 7 – Presentation and disclosure.	r <i>3</i>		
	Chapter 8 – Concepts of capital and capital maintenance.			
	AASB 2019-1 has also been issued which sets out the amendments to other pronouncements for references to the revised Conceptual Framework. The changes to the Conceptual Framework may affect the application of Accounting Standards in situations where no Standard applies to a particular transaction or event. In addition, relief has been provided in applying AASB 3 and developing accounting policies for regulatory account balances using AASB 108, such that entities must continue to apply the definitions of an asset and a liability and supporting concepts in the Framework for the Preparation and Presentation of Financial Statements (July 2004), and not the definitions in the revised Conceptual Framework.			
AASB 9 and	Financial Instruments	1 January	Α	1 January
relevant amending Standards	AASB 9 replaces AASB 139 Financial Instruments: Recognition and Measurement.	2018		2021
Standards	Except for certain trade receivables, an entity initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs.		11.1	
	Debt instruments are subsequently measured at FVTPL, amortised cost, or fair value through other comprehensive income (FVOCI), on the basis of their contractual cash flows and the business model under which the debt instruments are held.			
	There is a fair value option (FVO) that allows financial assets on initial recognition to be designated as FVTPL if that eliminates or significantly reduces an accounting mismatch.			
	Equity instruments are generally measured at FVTPL. However, entities have an irrevocable option on an instrument by instrument basis to present changes in the fair value of non-trading instruments in other comprehensive income (OCI) without subsequent reclassification to profit or loss.			

## Notes to the Financial Statements For the financial year ended 31 December 2019

- 2. Significant accounting policies (continued)
- (y) New Accounting Standards and Interpretations (continued)

Accounting Standards not yet effective (continued)

Standard	Summary	Application date of standard	Note	Application date for Group
AASB 9 and	Financial Instruments (continued)			
relevant amending Standards (continued)	For financial liabilities designated as FVTPL using the FVO, the amount of change in the fair value of such financial liabilities that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation in OCI of the fair value change in respect of the liability's credit risk would create or enlarge an accounting mismatch in profit or loss.			
	All other AASB 139 classification and measurement requirements for financial liabilities have been carried forward into AASB 9, including the embedded derivative separation rules and the criteria for using the FVO.			
	The incurred credit loss model in AASB 139 has been replaced with an expected credit loss model in AASB 9.			
	The requirements for hedge accounting have been amended to more closely align hedge accounting with risk management, establish a more principle based approach to hedge accounting and address inconsistencies in the hedge accounting model in AASB 139.			
	Having met the criteria introduced by AASB 2016-6 Amendments to Australian Accounting Standards – Applying AASB 9 Financial Instruments with AASB 4 Insurance Contracts, the application of AASB 9 Financial Instruments has been deferred to 1 January 2021.			
AASB 17	Insurance Contracts	1 January	С	1 January
	AASB 17 replaces AASB 4 Insurance Contracts, AASB 1023 General Insurance Contracts and AASB 1038 Life Insurance Contracts for for-profit entities. AASB 17 applies to all types of insurance contracts, i.e., life, non-life, direct insurance and reinsurance, regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features.	2021		2021
	The core of AASB 17 is the General (building block) Model supplemented by:			
	<ul> <li>A specific adaptation for contracts with direct participation features (Variable Fee Approach).</li> </ul>			
	<ul> <li>A simplified approach mainly for short duration contracts (Premium Allocation Approach).</li> </ul>			
	The main features of the new accounting model for insurance contracts are:			
	<ul> <li>A measurement of the present value of future cash flows, incorporating an explicit risk adjustment, remeasured every reporting period, i.e., the fulfilment cash flows.</li> </ul>			
	<ul> <li>A Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cash flows of a group of contracts, representing the unearned profitability of the insurance contract to be recognised in profit or loss over the service period (i.e., the coverage period).</li> </ul>			
	<ul> <li>Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining contract service period.</li> </ul>			
	<ul> <li>The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice.</li> </ul>			

### Notes:

- A. These changes only impact disclosure.
- B. These changes do not/are not expected to have a significant financial impact, if any.
- C. Details of the impact are still being assessed.

### Notes to the Financial Statements For the financial year ended 31 December 2019

### 3. Critical accounting judgements, assumptions and estimates

In the application of Australian Accounting Standards management is required to make judgements, assumptions and estimates about carrying values of assets and liabilities that are not readily apparent from other sources. The assumptions and estimates are based on historical experience and various other factors that are viewed as reasonable under the circumstances, the results of which form the basis of making the judgements. Actual results may differ from these estimates. The assumptions and estimates are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the financial year in which the estimate is revised.

### Key sources of estimation uncertainty

Judgements made by management in the application of Australian Accounting Standards that have a significant effect on the financial statements and estimates with a significant risk of material adjustments in the subsequent year are disclosed, where applicable, in the relevant notes to the financial statements.

Significant judgements and estimates are made by the Group to arrive at certain key asset and liability amounts disclosed in the financial statements. These judgements and estimates are continually being evaluated and are based on historical experience, as well as enhancements to actuarial modelling techniques.

The key areas of significant judgements and estimates and the methodologies used to determine key assumptions are set out below.

(a) Uncertainty over estimate of ultimate liability arising from claims made under general insurance contracts
Provision is made at the financial year end for the estimated cost of claims incurred but not settled at the balance sheet
date, including the cost of claims incurred but not reported and the cost of claims incurred but not enough reported to the
Group.

The estimation of net claims liabilities is based largely on the assumption that past developments are an appropriate predictor of the future and involves a variety of actuarial techniques that analyse experience, trends and other relevant factors. The process commences with the actuarial projection of the future claim payments and claims handling costs incurred to the balance sheet date. Each class of insurance is examined separately and some or all of the following will be considered for each class in projecting future claim payments:

- (i) Historical trends in the development and incidence of the number of claims reported, number of claims finalised, claim payments and reported incurred costs.
- (ii) Exposure details, including policy counts, sums insured, earned premium and policy limits.
- (iii) Claim frequencies and average claim sizes.
- (iv) The legislative framework, legal and court environments and social and economic factors that may impact upon each class of insurance.
- (v) Historical and likely future trends in standard inflationary pressures relating to commodity prices and wages.
- (vi) Historical and likely future trends of inflationary pressures in addition to price or wage inflation, termed superimposed inflation.
- (vii) Historical and likely future trends of expenses associated with managing claims to finalisation.
- (viii) Reinsurance recoveries available under contracts entered into by Ansvar.
- (ix) Historical and likely future trends of recoveries from sources such as subrogation and third party actions.
- (x) Insurer specific, relevant industry data and more general economic data is utilised in the estimation process.

Projected future claim payments and associated claims handling costs are discounted to a present value as required using appropriate risk free discount rates. A projection of future claims payments, both gross and net of reinsurance and other recoveries is undertaken.

This projection of the net central estimate is typically made without bias toward over or under estimation. As such, the resulting estimate is considered to be a net central estimate of claims liabilities. Where possible and appropriate, multiple actuarial methods will be applied to project future claim payments. This assists in providing a greater understanding of the trends inherent in the past data. The projections obtained from various methods also assist in setting the range of possible outcomes.

The most appropriate method or blend of methods is selected taking into account the characteristics of the class of insurance and the extent of the development of each past policy year.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 3. Critical accounting judgements, assumptions and estimates (continued)

### (a) Uncertainty over estimate of ultimate liability arising from claims made under general insurance contracts (continued)

Large claims impacting each relevant class of insurance are generally assessed separately, being measured on a case by case basis or projected separately in order to allow for the possible distortive effect of the development and incidence of these large claims.

As an estimate of future outcomes, the net central estimate of claims liabilities is subject to uncertainty. This uncertainty may consist of one or more of the following components:

#### Modelling

The process of managing and finalising claims is a complex one. Actuarial models represent a simplification of this complex process giving rise to the possibility that the actual future outcomes may depart from the modelled outcome.

#### Assumption selection

Even with a perfect model assumptions about future claim payment experience must be drawn from limited past data and are subject to sampling error.

#### Evolution of assumptions and future events

Some assumptions will be subject to changes over time due to external sources, such as changes to the legislative environment and the economic environment, or internal sources such as claim management practices.

#### Random variation

There is a certain amount of residual randomness that drives differences between actual and expected outcomes.

Uncertainty from the above sources is examined for each class of insurance and expressed as a volatility of the net central estimate. The volatility for each class is derived after consideration of stochastic modelling and benchmarking to industry analysis. The long tail Liability classes have the highest volatility as the longer average time to settle provides a greater opportunity for sources of uncertainty to emerge. Short tail classes such as Property and Motor have lower levels of volatility.

As the volatility for each class of insurance is partially correlated with other classes, when combined across the entire Group, the overall volatility will be less than the sum of the individual classes. With an estimate of the overall volatility for general insurance business, a range of risk margins associated with a probability of the total net claims liabilities proving adequate may be produced.

The assumptions with regard to uncertainty for each class of insurance are applied to the gross and net central estimates and the results are aggregated, allowing for diversification, in order to arrive at an overall net claims liability that is intended to have a 75% probability of sufficiency (2018: 75%).

### (b) Assets arising from reinsurance contracts

Assets arising from reinsurance contracts are also calculated using the above method. In addition, the recoverability of these assets is assessed on a periodic basis to ensure that the balance is reflective of the amounts that will ultimately be received, taking into consideration factors such as counterparty and credit risk. Impairment is recognised where there is objective evidence that the Group may not receive amounts due to it and these amounts can be reliably measured. Refer to Note 19 for a breakdown of reinsurance and other recovery assets.

### (c) Recoverability of future taxation losses

At the balance sheet date Ansvar makes an assessment whether it is probable that it will have taxable profits against which any temporary differences or unused taxation losses can be utilised before the unused taxation losses or unused taxation credits expire. In making this assessment Ansvar considers the expected level of taxable profits in its future business plans against which the taxable losses can be utilised.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 4. Actuarial assumptions and methods

### (a) Assumptions

The following assumptions have been made or are implied in determining the net claims liabilities:

	20	19	20	18
Company and Consolidated	Long tail	Short tail	Long tail	Short tail
Inflation rate – PSA class	2.50%		3.00%	-
Superimposed inflation rate – PSA class	2.00%		2.00%	=
Discount rate	1.24%		2.26%	-
Weighted average term to settlement (years)	4.54	1.11	5.23	1.10
Discounted mean term (years)	4.37	1.11	4.78	1.10
Large claim frequency (per annum)	1.00	•	1.25	-
Claim handling expense rate as a % of gross claims liabilities	8.00%	4.50%	8.00%	4.50%
Risk margin	18.32%	14.25%	17.98%	13.96%

### (b) Processes used to determine assumptions

The net claims liabilities are calculated using assumptions including the following:

#### Inflation rate

Insurance costs are subject to inflationary pressures over time.

For the Liability classes, claim costs associated with personal injuries may be linked to the weekly earnings of the claimant. Medical and legal costs are subject to increases in the wages and disbursements of professionals in those fields. These standard inflationary pressures are collectively termed wage inflation.

For the Property and Motor classes, claim costs are related to the inflationary pressures of the materials and goods insured as well as labour costs to effect repairs. It is therefore expected that these costs will increase at an appropriate blend between the Consumer Price Index and wage inflation. The Property and Motor classes typically use an actuarial method in which the inflation assumption is implicit and incorporated in historical levels of claims development.

### Superimposed inflation rate

There is a tendency for claim costs, particularly for the Liability classes, to increase at levels in excess of standard inflationary pressures. This can be due to a number of factors including court awards and precedents and social and environmental pressures. This is often termed superimposed inflation and is analysed and forecast separately from wage inflation.

#### Discount rate

The net claims liabilities for the Liability classes are discounted at a rate equivalent to that inherent in a portfolio of risk free fixed interest securities with coupon and redemption cash flows exactly matching the projected inflated claim cash flows.

For the Property and Motor classes the net claims liabilities are not discounted due to their expected payment in the near term.

#### Weighted average term to settlement

The weighted average term to settlement is calculated separately by class of insurance and is based on historic settlement patterns.

### Claims handling expense allowance

An estimate of claims liabilities will incorporate an allowance for the future cost of administering the claims. This allowance is determined after analysing claim related expenses incurred by the various classes of insurance.

### Risk margin

The overall risk margin is determined allowing for diversification between classes of insurance and the relative uncertainty of the claims liability estimate for each class.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 4. Actuarial assumptions and methods (continued)

### (b) Processes used to determine assumptions (continued)

The assumptions with regard to uncertainty for each class of insurance are applied to the gross and net central estimates and the results are aggregated, allowing for diversification, in order to arrive at an overall net claims liability that is intended to have a 75% probability of sufficiency (2018: 75%).

### Ultimate claims ratio

This is the ratio of ultimate net claims incurred to ultimate net premium earned.

### (c) Sensitivity analysis

The Group conducts sensitivity analysis to quantify the exposure to the risk of changes in the underlying assumptions used in the annual financial statements.

The sensitivity of the Group's net claims liabilities and loss before income taxation to key actuarial valuation assumptions is disclosed in the table below:

Company and Consolidated Impact net of recoveries Long tail Short tail Movement in Variable variable \$'000 \$'000 Inflation rate +1.0% 4,418 -1.0% (4,041)Superimposed inflation rate +1.0% 2,111 -1.0% (1,948)Discount rate +1.0% (4,041)-1.0% 4,418 Ultimate net claims ratio for the latest policy year (Long tail 53%; +10.0% 2,356 736 Short tail 107%) -10.0% (2,356)(736)IBNR for prior policy years +10.0% 5,765 -10.0% (5,765)Claims handling expense rate +1.0% 1,157 499 -1.0% (499)(1,157)Risk margin +1.0% 888 71 -1.0% (888)(71)

### 5. Risk management

### (a) Risk management framework

The Group values risk management as an integral part of its governance framework and decision making processes. The Board accepts ultimate responsibility for:

- Setting the tone from the top for risk management culture.
- Ensuring the effectiveness of the risk management framework and the systems of internal and accounting control.
- Compliance with legislative and regulatory obligations including capital and solvency requirements.

The Group's Risk and Compliance function is led by its Chief Risk Officer who is responsible for the ongoing development of its risk management framework, policies and standards. The application of the risk management framework across the Group provides reasonable assurance that key risks are identified and adequately managed. The framework is regularly reviewed to ensure it remains fit for purpose and effective. The Group outsources its internal audit function to provide independent and objective assessment of its governance, risk management and internal control activities.

The Risk Management Strategy is a core component of the risk management framework and details the strategy for identifying, managing and reporting risks on the achievement of the Group's strategic and operational objectives. It includes an agreed approach to assessing, mitigating and monitoring material risks. The Risk Management Strategy is formally reviewed and approved by the Board annually and any material changes are submitted to APRA.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 5. Risk management (continued)

#### (a) Risk management framework (continued)

In addition to the Risk Management Strategy, the Group's risk management framework includes the following key documents:

- Risk Management Policy sets out the Group's commitment to risk management as a driver of effective governance.
- Risk Appetite Statement defines the parameters the Board has set for acceptable and unacceptable risk taking.
- Reinsurance Management Strategy details the reinsurance management framework, including the selection, implementation, monitoring, review, control and documentation of reinsurance arrangements.
- Internal Capital Adequacy Assessment Process (ICAAP) Summary Statement sets out the Group's capital assessment and management processes and monitoring controls.

### (b) The Group's material risks

As detailed in the Risk Management Strategy, the Group has identified the following areas of material risk to its success. These risks form part of the Group's risk profile and are subject to formal risk assessment and management.

Material risk areas	Represented by the Group's failure to
Governance Strategy Compliance Culture Customer centricity	<ul> <li>Deliver a robust Corporate Plan and Budget for protecting and enhancing Ansvar's competitive position.</li> <li>Comply with regulatory obligations and maintain a culture of ethical leadership.</li> <li>Actively engage, develop and retain staff during times of significant change.</li> </ul>
Insurance Pricing and portfolio management Reinsurance Claims Distribution	<ul> <li>Accurately assess and underwrite risk exposures.</li> <li>Maintain adequate margin and reserves across portfolios of insurance business.</li> <li>Prevent unauthorised claims, payments or leakage.</li> <li>Maintain affordable and appropriate reinsurance programmes.</li> </ul>
Financial Liquidity Market conditions Credit risk Project costs	<ul> <li>Adequately manage assets, liabilities, exposures and investments.</li> <li>Maintain the integrity of management, prudential and financial reporting.</li> <li>Avoid default by reinsurers, insurance counterparties or investment counterparties.</li> <li>Manage project costs within agreed budgets.</li> </ul>
Operational Core business systems Data governance Business continuity	<ul> <li>Maintain effective business systems.</li> <li>Protect against inaccurate data and data loss or misuse.</li> <li>Protect against disruption to customer services.</li> </ul>

### (c) Mitigation strategies for material risk areas

### (i) Governance risk

Management of the Group's governance risks centres on ensuring strong ethical leadership and a robust business strategy.

The pillars of the Group's approach for mitigating governance risks are as follows:

- The Board approves the annual Corporate Plan and Budget and monitors performance with a comprehensive suite of key performance and risk indicators.
- The Board and shareholder set the tone for ethical leadership and conduct across the business. Management reporting is designed to provide early warning of any weaknesses in risk controls.
- High importance is placed on maintaining and reporting compliance with regulatory obligations. A comprehensive compliance framework is in place, supported by a three lines of defence approach to compliance monitoring.
- Staff leadership, training and engagement programmes are well established and regularly reviewed.

## Notes to the Financial Statements For the financial year ended 31 December 2019

### 5. Risk management (continued)

### (c) Mitigation strategies for material risk areas (continued)

#### (ii) Insurance risk

Effective management of insurance risk across short and long tail exposures is fundamental to the Group's success and financial stability.

Key strategies for mitigating insurance risk are underpinned by the following:

- Underwriting, actuarial and analytics capability are well established and supported by a comprehensive suite of operating procedures.
- Approaches to managing and testing underwriting practices are detailed in the Group's corporate policies, quality assurance program, delegated authorities framework, Reinsurance Management Strategy and ICAAP.
- Claims are managed by a central team of claims specialists and insurance liabilities are regularly assessed and monitored.

#### (iii) Financial risk

There are four overarching areas of financial risk:

- Market risk a weakened financial position as a result of changes in market conditions, such as equity prices, interest rates and commodity prices.
- Liquidity risk the Group is unable to liquidate investments to settle its financial obligations when they fall due.
- Credit risk the Group's liquidity may be impacted by the timeliness of payments received from brokers, reinsurers or other debtors. This may arise from counterparty default risk, spread risk or market concentration risk.
- Currency risk arises from the change in price of one currency against another when transactions involve foreign currency.

The Group has established policies and procedures for mitigating financial risks:

- Balance Sheet and Market Risk Policy identifies the main sources of market risk applicable to the Group and details how these are measured, monitored and controlled.
- Credit Risk Policy details the parties with whom credit will be granted and the controls and processes in place for maximising cash flows and dealing with defaults.
- Investment Policy describes the risk appetite profile and gives delegated authority to minimise risks.
- Outsourcing Policy sets out the standards required by all companies to whom the Group outsources any of its material functions.
- ICAAP Summary Statement.

### Market risk (incorporating interest rate risk, currency risk and price risk) and liquidity risk

The Group has identified the following key risk exposures:

- Movements in interest rates and inflation and widening of credit spreads which impact on the values of fixed interest securities.
- Reduced levels of investment income.
- Contraction in market liquidity.
- · Adverse changes in the value of foreign currency assets.
- Inadequate processes for valuing assets.

The Group has determined the nature and extent of the market risks to which it considers acceptable. These limits are documented in Ansvar's Risk Appetite Statement and Investment Policy.

The Group's Finance Department performs regular stress testing to determine the impact of interest rate risk, currency risk and price risk on the Group's Balance Sheet. The stress testing determines the APRA risk charge and this then forms the capital which APRA considers appropriate to hold in relation to the asset risks to which the Group is exposed.

Stress testing is the key analysis performed by the Group on the appropriateness of the matching of assets and liabilities.

#### Credit risk

Credit risk is the potential for losses from counterparties failing to fulfil their financial obligations to the Group. Credit risk generally arises from investment activities, reinsurance activities and dealings with any intermediaries such as brokers. The Group has a Credit Risk Policy which is approved by the Board and reviewed on a regular basis.

## Notes to the Financial Statements For the financial year ended 31 December 2019

- 5. Risk management (continued)
- (c) Mitigation strategies for material risk areas (continued)
- (iii) Financial risk (continued)

### Credit risk (continued)

### Investments

The Group is exposed to credit risk from investments where it holds debt and securities issued by companies and Federal and State Governments. The Group has set limits to specific investments which are described in the Financial and Investment Overarching Policy, Investment Policy and Risk Appetite Statement and are monitored and assessed at regular intervals. Breaches of any investment limits are reported in accordance with policies and procedures.

#### Reinsurers

Reinsurance arrangements are critical in mitigating insurance risk. The Group reinsures a portion of the risks it underwrites to control exposure to losses, stabilise earnings, protect capital resources and ensure efficient control and spread of the underwriting risk. The Group purchases reinsurance based on an evaluation of the reinsurers' financial strength including its credit rating, length and quality of relationship with the Group, pricing, the Group's risk appetite limits and the specific expertise of the reinsurer. On appointment, the Group requests terms and conditions from reinsurers. These terms and conditions address coverage and price and then reinsurers respond with an offer to underwrite a percentage of the programme or layer at a selected price and with certain conditions.

The financial probity of reinsurers is determined with the assistance of the Ecclesiastical Insurance Office Plc Group Reinsurance Security Committee which performs regular analysis of reinsurers' credit ratings and performance against certain criteria.

The Risk Appetite Statement requirements are monitored by the Chief Financial Officer and reported to the Risk and Compliance Committee. Given the importance of the Group's reinsurance programme to provide adequate cover, reinsurer relationships are closely monitored in order to detect any change in attitude, appetite or approach, and mitigate any potentially negative effects.

### **Brokers**

The Group engages a credit monitoring agency to provide ongoing monitoring of the credit worthiness of the Group's brokers and other intermediaries. Any changes in credit worthiness advised by the monitoring agency are reviewed to assess whether brokers and other intermediaries continue to represent an acceptable risk.

### (iv) Operational risk

Management of the Group's operational risk centres on ensuring robust business systems, data governance and workforce capability are maintained.

Key mitigation strategies include the following:

- The Group's business systems are a combination of technology solutions, work flows and operating procedures.
   Assessing the design and effectiveness of controls is embedded in the Group's risk management framework and regularly reported to the Board and the Group's shareholder through a suite of key performance and risk indicators.
- The Group has developed a business continuity management framework that includes disaster response, cyber
  incident management and contingency plans. Business continuity tests are performed periodically with outcomes
  reported to the Chief Executive Officer and the Risk and Compliance Committee.
- In accordance with the Group's Outsourcing Policy, key controls for mitigating outsourcing risk include thorough due
  diligence when selecting service providers, agreeing appropriate contractual arrangements and ensuring robust
  business continuity arrangements are in place and regularly tested.
- The Financial Crime Policy addresses the risks of both internal and external fraud. It sets out the controls to mitigate
  fraud and the processes for investigating suspected fraudulent activity.
- High importance is placed on data governance and security. Controls include server patching and testing, Domain Name System filtering, intrusion protection and detection systems, vulnerability testing, data asset management, policies, procedures and staff training.
- The Human Resources Department ensures that management policies, processes and procedures are in place to
  identify and manage operational risks involving employees, contractors and third parties. The Human Resources
  Department oversees sourcing, selecting, recruiting, developing and retaining staff with the necessary skills and
  experience.

# 15. Right of use assets and lease liabilities

The date of initial application of *AASB 16 Leases* for the Group is 1 January 2019. The Group has applied *AASB 16* using the modified retrospective approach with no restatement of the comparative information.

## (a) Impact of the new definition of a lease

The definition of a lease in accordance with AASB 117 Leases and Interpretation 4 Determining whether an Arrangement contains a Lease will continue to be applied to those contracts entered into or modified before 1 January 2019. The Group applies the definition of a lease and related guidance set out in AASB 16 to all contracts entered into or modified on or after 1 January 2019.

#### (b) Impact on lease accounting

AASB 16 changes how the Group accounts for leases previously classified as operating leases under AASB 117 which were off balance sheet.

Applying AASB 16 for all leases except short term leases and leases of low value assets the Group:

- Recognises right of use assets and lease liabilities in the Balance Sheet initially measured at the present value of the future lease payments.
- Recognises depreciation of right of use assets and interest on lease liabilities in profit or loss.
- Separates the total amount of cash paid into a principal portion, presented within financing activities, and interest, presented within operating activities, in the Cash Flow Statement.

# Notes to the Financial Statements For the financial year ended 31 December 2019

### 15. Right of use assets and lease liabilities (continued)

# (b) Impact on lease accounting (continued)

Lease incentives, for example, a rent free period, are recognised as part of the measurement of the right of use assets and lease liabilities.

Under AASB 16 right of use assets are tested for impairment in accordance with AASB 136 Impairment of Assets.

For short term leases, i.e., lease term of 12 months or less, and leases of low value assets, for example, tablets, personal computers, small items of office furniture and telephones, the Group has opted to recognise a lease expense on a straight line basis as permitted by *AASB 16*. This expense is disclosed as operating lease expenditure in profit or loss.

#### (c) Financial impact of initial application of AASB 16

The table below shows the amount of adjustment for each financial statement line item affected by the application of AASB 16 for the current year.

Impact on loss before income taxation for the year

Increase in finance costs on leases
Increase in depreciation of right of use assets
Decrease in operating lease expenditure
Increase in loss before income taxation

	oany and solidated
THE P	2019
	\$'000
	(52)
	(917)
	914
	(55)

### Impact on assets, liabilities and equity at 1 January 2019

The application of AASB 16 to leases previously classified as operating leases under AASB 117 resulted in the recognition of right of use assets of \$2,850K and lease liabilities of \$2,850K. It also resulted in a decrease in operating lease expenditure of \$914K and an increase in depreciation of \$917K and finance costs on leases of \$52K.

# Impact on Cash Flow Statement

The application of AASB 16 has an impact on the Cash Flow Statement of the Group. Under AASB 16 the Group must present:

- Short term lease payments, payments for leases of low value assets and variable lease payments not included in the
  measurement of the lease liability as part of operating activities.
- Cash paid for the interest portion of a lease liability as either operating activities or financing activities as permitted by *AASB 107*. The Group has opted to include finance costs on leases as part of operating activities.
- Cash payments for the principal portion for a lease liability as part of financing activities.

Under AASB 117 all lease payments on operating leases were presented as part of cash flows from operating activities. Consequently, the net cash generated by operating activities has increased by \$862K and net cash utilsed in financing activities has increased by the same amount.

## 22. Liability adequacy test

At 31 December 2019 the liability adequacy test on the net unearned premium liability is a deficit of \$2,208K (2018: surplus \$2,338K) which has resulted in a write down of gross deferred acquisition costs (refer to Note 17). The hail catastrophe event in January 2020 and the East Coast Low storms in February 2020 were taken into account in the calculation of the liability adequacy test and had the effect of changing the surplus of \$2,983K into a deficit of \$2,208K. The probability of sufficiency adopted in undertaking the liability adequacy test is 75% (2018: 75%). Refer to Note 4 for the process for determining the overall risk margin including the way in which diversification of risks has been allowed for.

# Notes to the Financial Statements For the financial year ended 31 December 2019

#### 25. Financial instruments

#### (a) Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 2.

## (b) Financial risk management objectives

It is ultimately the responsibility of the Board to ensure that there is an effective risk management control framework in place. Consistent with regulatory requirements the Board has explicitly allocated the function of overseeing the establishment and maintenance of risk based systems and controls across the Group to the Chief Executive Officer.

As part of the overall governance framework the Group has established a number of Board and management committees to oversee and manage the financial risks facing the Group which are outlined in Note 5.

The Group has assessed the effectiveness of the controls in place to mitigate the risks and implemented appropriate policies for managing these risks. In order to establish the parameters within which risk must be managed, the Group has also developed a Risk Appetite Statement. Both the risk policies and Risk Appetite Statement are subject to annual review to ensure they reflect the changing risk profile of the business.

## (c) Categories of financial instruments

		Company and Cons	olidated
		2019	2018
	Note	\$'000	\$'000
Financial assets			
Cash and cash equivalents	11	19,020	22,288

Trade and other receivables	13	54,360	44,674
Financial liabilities			
Trade and other payables	20	(31,554)	(24,079)

Financial assets carried at fair value through profit or loss have been designated as such upon initial recognition.

The table below provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value is determined by using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value is determined by using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3 fair value is determined by using inputs for the asset or liability that are not based on observable market data (i.e., unobservable inputs).

During the year there were no transfers between the three levels.

## (i) Valuation technique and significant unobservable input for Level 3 financial instrument

The table below discloses the valuation technique and the significant unobservable input used in the fair value measurement of the financial instrument categorised within Level 3 of the fair value hierarchy:

# Financial instrument measured at fair value

Туре	Valuation technique	Significant unobservable input	Inter-relationship between significant unobservable input and fair value measurement
Loans – unlisted	Discounted cash flows – the valuation considers the present value of the net cash flows expected to be generated under the loan arrangements. The expected net cash flows are discounted using a risk adjusted discount rate.		The fair value would increase if the risk adjusted discount rate was lower.

### (ii) Level 3 fair value hierarchy reconciliation

Balance at end of year	244	243

# Notes to the Financial Statements For the financial year ended 31 December 2019

## 25. Financial instruments (continued)

## (d) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted the policy of only dealing with creditworthy counterparties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults. The policies and procedures in place to mitigate the Group's exposure to credit risk are described in Note 5.

The Group actively monitors the credit ratings of reinsurers to ensure there is no significant exposure that requires immediate attention and action. There have been no issues or defaults with reinsurer payments to date.

The table below discloses the maximum exposure to credit risk for the components of the financial assets. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting or taking account of the value of any collateral or other security obtained.

# (e) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting its obligations associated with financial instruments. Ultimate responsibility for liquidity risk management rests with the Board which oversees the liquidity risk management framework for the management of the Group's short, medium and long term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves and by continuously monitoring forecast and actual cash flows and matching the maturity profiles of assets and liabilities. As required by APRA *Prudential Standard GPS 220 Risk Management*, the Group has developed and implemented a Risk Management Strategy which is outlined in Note 5.

The Group's trade and other payables are disclosed in Note 20 and are non-interest bearing and normally settled within 12 months.

# Notes to the Financial Statements For the financial year ended 31 December 2019

### 25. Financial instruments (continued)

### (f) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market interest rates (interest rate risk), foreign exchange (currency risk) and market prices (price risk). Refer to Note 5 for details of the policies and procedures in place to mitigate the Group's exposure to market risk. There have been no changes to the Group's exposure to market risks or the manner in which it manages and measures the risk during the current financial year.

## Interest rate risk management

The Group's activities expose it to the financial risk of changes in interest rates. Floating rate instruments expose the Group to cash flow risk, whereas fixed interest rate instruments expose the Group to fair value interest rate risk. The impact of movements in interest rates on the Group's profit or loss is mitigated by the Group's policy of investing in assets backing net insurance liabilities principally in fixed interest securities that are matched to the duration of the net claims liabilities. Therefore, movements in the fair value measurement of the assets broadly offset the impact of movements in the net claims liabilities from changes in interest rates. The Group's Board monitors the Group's exposure to interest rate risk as outlined in Note 5.

The following table details the Group's expected maturity dates based on the undiscounted contractual maturity dates of the financial assets.

	Company and Consolidated				
2019	Weighted average interest rate %	Under 1 year \$'000	1-5 years \$'000	Over 5 years \$'000	Total \$'000

## Interest rate sensitivity

The sensitivity analysis below has been determined based on the exposure to interest rates at the balance sheet date. The sensitivity analysis assumes that the change takes place at the balance sheet date with investments marked to market as at the same date. A 1.0% increase or decrease in interest rates is used by the Appointed Actuary in the claims sensitivity analysis in respect of the discount rate in Note 4. The same percentage has been used in this sensitivity analysis to present the impact on interest bearing investments. These movements are attributable to the Group's exposure to interest rates on its variable interest rate investments and the fair value movement on its fixed interest rate investments.

At the balance sheet date if interest rates had been 1.0% (2018: 1.0%) higher and all other variables were held constant, the Group's investments and loss before income taxation would decrease and increase respectively by \$4,513K (2018: \$2,881K). This movement would substantially offset the impact on the Group's net claims liabilities due to a 1.0% increase in discount rates as disclosed in Note 4.

### Foreign currency risk management

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Refer to Note 5 for details on how the Group manages exchange rate exposure. The Group's overall strategy in respect of foreign currency risk management did not change during the current financial year.

### Price risk

The Group does not hold equity investments and has no exposure to equity price risks arising from equity investments.

### 26. Operating lease commitments

	Company and
	Consolidated
	2018
	<u></u> \$'000
Not later than one year	1,761
Later than one year and not later than five years	2,676
Total operating lease commitments	4,437

Operating lease commitments at 31 December 2018 related to office premises, computer hardware, office equipment and motor vehicles with lease terms of up to six years. The Group does not have the option to purchase leased assets at the expiry of the lease periods.

### 27. Contingent assets and contingent liabilities

Ansvar has a bank guarantee facility totalling \$533,591 (2018: \$534,010) which comprises an undertaking by the bank pursuant to agreements for leased office premises in the event of extinguishing liabilities if necessary. The unused amount of the facility at 31 December 2019 is \$533,591 (2018: \$534,010).

#### 28. Related parties

Ansvar's related parties fall into the following categories:

#### Controlled entity

Information relating to the controlled entity is set out in Note 29.

#### Holding companies

The ultimate holding company in the wholly-owned group is AllChurches Trust Limited, incorporated in the United Kingdom. The immediate holding company of the Group is Ecclesiastical Insurance Office Plc, incorporated in the United Kingdom.

#### Directors

Refer to the Directors' Report for details of Ansvar's Directors during the current financial year.

Jacinta Whyte was a Director and Group Deputy Chief Executive of Ecclesiastical Insurance Office Plc, Ansvar's immediate holding company, during the current financial year.

Warren Hutcheon was Chief Executive Officer and a Director of ACS (NZ) Limited, Ansvar's former subsidiary domiciled in New Zealand, during the current financial year.

Warren Hutcheon was a Director and Michael Grantham was Chairperson of Ansvar Risk Management Services Pty Limited (ARMS), Ansvar's fellow subsidiary, during the current financial year. ARMS delivered risk services to Ansvar's customers and Ansvar seconded staff and provided support services to ARMS in terms of a management services agreement during the current financial year.

### Other transactions with Directors or their related entities

The loss/profit before income taxation includes the following item that resulted from a transaction with a related entity of a Director:

Management services fee income - ACS (NZ) Limited

177

134

# Notes to the Financial Statements For the financial year ended 31 December 2019

### 28. Related parties (continued)

#### Other transactions with Directors or their related entities (continued)

Ansvar provides management services to ACS (NZ) Limited. The management services agreement includes a performance based management fee of NZD3 million which may be payable to Ansvar once ACS (NZ) Limited has settled all claims against it. In the normal course of business, Ansvar incurs certain expenses which are recharged to ACS (NZ) Limited. There were no other transactions between the entities during the year.

The above transactions were made on commercial terms and conditions and at market rates.

In the normal course of business, insurance policies are provided to certain entities related to the Directors. These insurance policies are provided on an arm's length basis.

### Wholly-owned group

The wholly-owned group consists of AllChurches Trust Limited and its wholly-owned controlled entities, including Ansvar and its controlled entity. Ansvar's ownership interest in its controlled entity is set out in Note 29.

Ansvar entered into the following transactions with its holding company:

The same are the s	Company and Consolidated	
	2019 \$'000	2018 \$'000
Income		
Reinsurance recoveries	1	352
Expenses

Asset Risk Charge	15,769	13,904
Operational Risk Charge	3,937	3,020
Less: Aggregation Benefit	(8,418)	(7,125)
Total Prescribed Capital Amount	34,473	28,228
Prescribed Capital Amount Coverage Ratio	1.82	2.73
31. Reconciliation of (loss)/profit after income taxation to net cas	h inflow/(outflow) from operating ac	tivities
(Loss)/profit after income taxation	(3,488)	4,195
Depreciation of furniture, fittings and equipment	52	138
Depreciation of right of use assets	917	=
Realised losses on disposal of investments	1,298	59
Unrealised (gains)/losses on investments	(3,589)	986
Increase in current taxation asset	(2,679)	-
Increase in deferred taxation asset	(2,538)	(73)
Decrease in current taxation liability	(774)	(72)
Increase/(decrease) in deferred taxation liability	1,022	(116)
Changes in operating assets and liabilities:		
Increase in trade and other receivables	(9,763)	(7,501)
Increase in deferred Emergency Services Levy	(507)	(853)
Increase in gross deferred acquisition costs	(83)	(1,273)
(Increase)/decrease in reinsurance and other assets	(25,077)	9,661
Increase/(decrease) in trade and other payables	9,100	(2,619)
7		

# 32. Subsequent events

Increase in provisions

Increase in ceded deferred acquisition costs

Increase/(decrease) in gross insurance liabilities

Net cash inflow/(outflow) from operating activities

There has not been any matter or circumstance that has occurred between the balance sheet date and the date of this report that has significantly affected, or may significantly affect, the Group's and the Company's operations in future financial years, the results of those operations or the Group's and the Company's state of affairs in future financial years. Refer to Note 22 for the impact of the hail catastrophe event in January 2020 and the East Coast Low storms in February 2020 on the calculation of the liability adequacy test.
