Risk management is key to sustainable success

Change is a constant, and with change comes new risks that need to be managed, and if necessary, mitigated.

Ansvar's contemporary and sector relevant risk management solutions keep pace with the changes in our core sectors – from service delivery models to new legal or compliance standards.

Our risk management solutions supports your organisation to:

- Provide governance and regulatory assurance for Boards
- Identify issues early and avoid claims, ultimately leading to reduced premiums
- Attract Board and leadership talent
- Attract government as well as consumer funding
- Develop sustainable business models in rapidly changing environments

Risk Management Solutions

Ansvar Risk provides a package of holistic risk management solutions through a highly experienced risk solutions team who understand risk and the requirements for organisations across our core sectors.

Risk management solutions include:

Enterprise Risk Management

Identifying, managing and prioritising organisational risks using risk consultancy and workshops, online risk packages and our risk partners services.

Risk Quality Surveys

Fast and accurate site inspections, data collection and sums insured calculations for informed risk management and insurance decision making.

Online Risk Tools

Fact sheets, checklists and guidelines supporting you to better understand and effectively manage risks.

Enterprise Risk Management

Identifying, managing and prioritising risk

Enterprise Risk Management helps organisations to achieve its objectives, make better decisions and prevent harm. It is a crucial component of good governance. It helps identify vulnerabilities and risks, prioritise management actions and provide relevant information to key decision makers.

Enterprise Risk Management services:

- Are tailored for the specialist sectors we work with and support
- Support with **governance** and **management** of organisations risks provided by our expert risk consultants
- Deliver accurate **data** for robust decision-making and create capability through our online risk packages software: **Incident Reporting** and **Learn**.
- Mitigate against organisational and specific operational risks
- Provide expert services of our **risk partnerships** in employment practices, background checks and online training for churches

Risk Quality Surveying

Site inspections, data collection and sums insured calculations for better risk management

Through Risk Quality Surveys our Risk Advisors undertake site inspections, collecting a range of data and information to determine and assess:

- The likelihood and potential severity of risk occurrences

- Potential property and liability risks, for example, gutter and roof maintenance, electrical systems, uneven floor surfaces, chemical storage and employee screening through background checks

Drone Enabled Surveys

In order to collect data on all aspects of a building or large area, Ansvar's Risk Advisors may use a combination of drones, laser technology, photogrammetry and 360 degree cameras for quick and efficient image capture.

Using the latest state-of-the art drones and technologies:

- Provides immediate identification of current issues or potential risk exposures
- Provides greater accuracy, with easy access to perform roof and vegetation inspections
- Data collected can be geo-referenced to enable flood and storm path modelling
- Creates 3D visuals
- ▶ Examples of our drone footage can be viewed on www.ansvarrisk.com.au

Insightful Reporting

Insightful Risk Quality Survey reporting takes place in order to help you make informed decisions.

Reports provide

- Quality rating
- Recommendations to mitigate risks
- A clear pathway for your organisation to improve their risk quality
- Benchmarking your organisation to your sector.

Online Risk Tools

Industry-specific information to effectively understand and manage risks

Not everyone has a dedicated risk manager to lead risk management. It's often a shared responsibility, and Ansvar Risk offers a range of tools such as fact sheets, checklists and guidelines to support everyone in your organisation to prioritise and manage risks.

Our sector relevant tools mean that following a Risk Quality Survey you have:

- Ongoing support in managing risks
- Access to sector standards that impact risk assessment
- Tools to help prioritise your actions and expenses
- Information that builds internal risk management capability

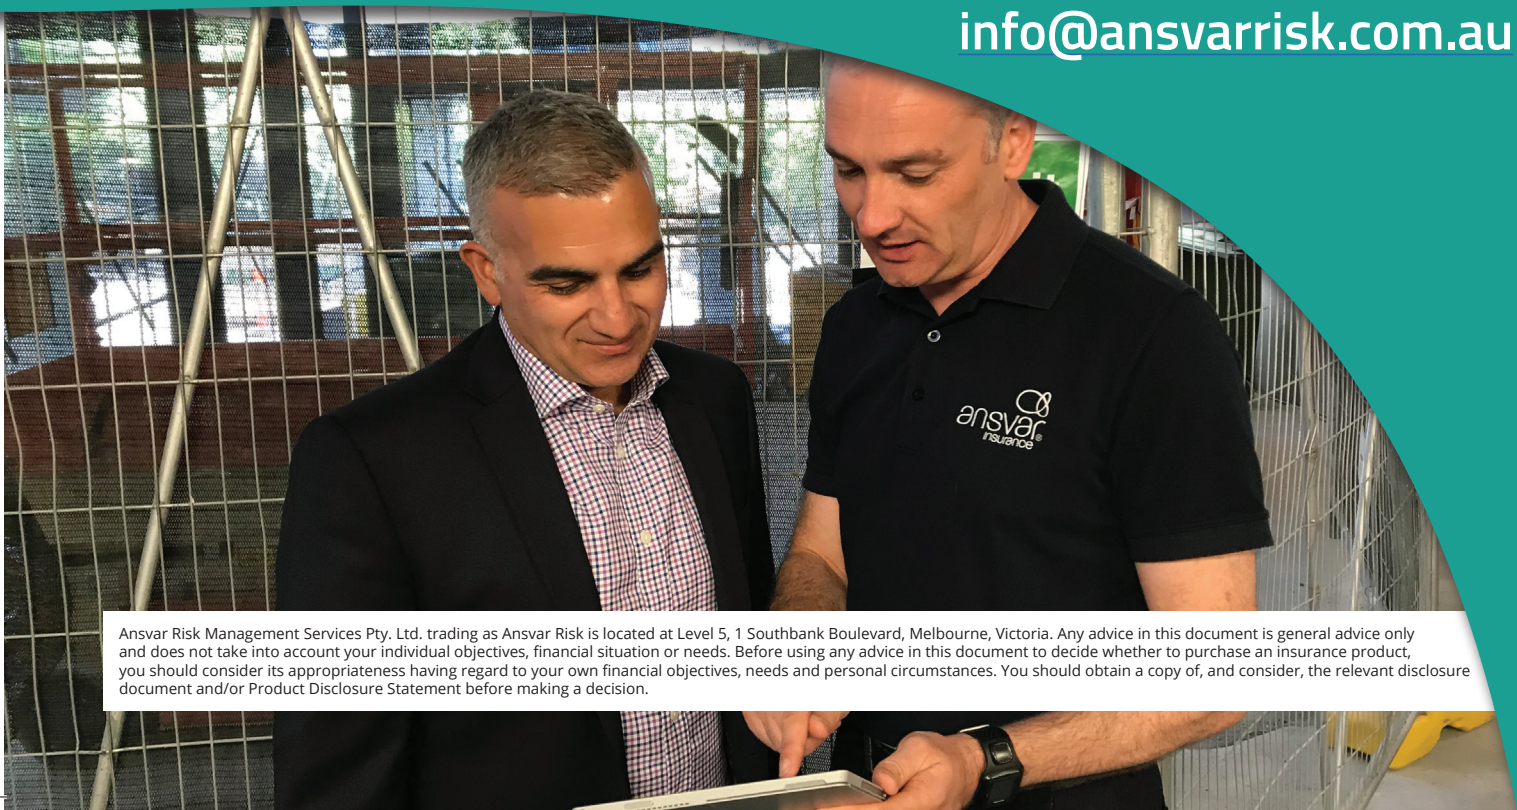

Why Ansvar Risk?

Ansvar Risk supports, educates and provides specific risk management tools so organisations are fully equipped to manage risks.

Ansvar Risk will work with our broker partners and customers, using the latest frameworks and technologies to capture data that helps identify risks that can be addressed through risk management interventions. Ultimately this will lead to reduced incidents that cause harm and therefore reduced premiums for our customers.
